1. Organisation Overview

Des-Lux Play is a luxury stuffed toy business founded by Des-J Sekgobela in 2020 in Burgersfort, Limpopo, South Africa. It specializes in handcrafted, customizable stuffed toys and limited-edition collections. The brand donates 10% of profits to children's charities and targets parents, gift buyers, collectors, and corporate clients. The slogan is 'Where Luxury Meets Imagination'.

2. Website Goals and Objectives

The goal is to establish a professional digital presence that drives custom orders and showcases limited-edition releases. Objectives include increasing brand awareness, streamlining custom orders, promoting monthly giveaways held every last Friday, and communicating charitable impact. KPIs target 5,000 monthly visitors, a 15% enquiry-to-sale conversion rate, and 500 email subscribers within six months.

3. Current Website Analysis

Des-Lux Play currently has no website. Sales and enquiries are managed through WhatsApp and Instagram, limiting scalability and credibility. A professional website will centralize product information, automate enquiries, capture customer data, and build trust beyond social media.

4. Proposed Website Features and Functionality

The site will have five pages. The homepage will feature a hero banner, product highlights, a charity tracker, and giveaway countdown. About Us will present the founder's story. Products will catalog standard, custom, and limited-edition items. Enquiry will host a custom order form with budget selection and file upload. Contact will include a messaging form, business hours, and maps for Burgersfort and Polokwane.

5. Design and User Experience

The aesthetic communicates luxury and warmth. The palette uses Deep Plum (#4A1C40), Soft Blush (#F4E1E1), Antique Gold (#C5A059), and Ivory White (#FAF9F6). Typography uses Playfair Display for headings and Open Sans for body text. The layout employs whitespace,

card-based displays, and sticky navigation. Low-fidelity wireframes will guide mobile-first, accessible design.

6. Technical Requirements

The site will use HTML5, CSS3, and JavaScript, hosted on Netlify or GitHub Pages. Version control will be managed through GitHub. Images will be optimized using Squoosh, and forms will use Netlify Forms or Formspree.

7. Timeline and Milestones

Weeks 1–2: Research and proposal approval. Weeks 3–4: Content gathering and sitemap. Weeks 5–6: HTML development. Week 7: Testing, documentation, and Part 1 submission.

8. Budget

First-year costs total approximately R1,400, including domain registration (R200) and hosting (R1,200). Development and imagery will use free resources.
