Website Project Proposal: Gift of the Givers

1. Organisation Overview

Gift of the Givers is South Africa's largest disaster response NGO, founded in 1992 by Dr Imtiaz Sooliman in Durban. It provides medical aid, water, food relief, and education support locally and internationally. Target audiences include donors, corporate sponsors, volunteers, and beneficiaries.

2. Website Goals and Objectives

Increase online donations by simplifying the donation process. Streamline volunteer recruitment through an online enquiry form. Enhance transparency via project outcomes and financial reports. Improve emergency response communication with real-time crisis updates.

3. Current Website Analysis

The existing site (giftofthegivers.org) is functional but information-heavy, making navigation overwhelming. The mobile experience is cluttered, donation steps are excessive, and volunteer information is hard to find. A redesign will prioritise clarity, faster access to key actions, and improved mobile usability.

4. Proposed Features and Functionality

Five core pages:

Page	Purpose
Homepage	Active campaigns, emergency alerts, donation CTA, navigation
About Us	History, founder profile, mission, vision, impact statistics
Projects	Categorised relief work: medical, water, food, education, disaster
Enquiry	Volunteer application, corporate partnership, beneficiary assistance
Contact	Head office, regional offices, phone, email, map, social media

5. Design and User Experience

The design conveys trust and compassion. Colours: medical blue (#005EB8), green (#2E7D32), white, and grey. Typography: Montserrat (headings) and Open Sans (body). Layout: clean grid with clear hierarchy, prominent 'Donate Now' and 'Volunteer' buttons, emergency alert banner, and accessible navigation.

6. Wireframes

Low-fidelity wireframes are attached. The homepage includes an emergency alert strip, campaign hero, impact statistics, featured projects grid, and footer. The enquiry page uses tabbed sections for volunteer, partnership, and beneficiary forms.

7. Technical Requirements

Hosting: Afrihost or Xneelo with a .co.za domain. Languages: HTML5, CSS3, JavaScript (form validation, tabs). Tools: Visual Studio Code, GitHub, Chrome DevTools, Squoosh. Payment gateway (PayFast) recommended for Part 3.

8. Timeline and Milestones

Week	Task
1	Research, content gathering, current site analysis, sitemap
2	Build semantic HTML structure
3	Integrate content and optimise images
4	Cross-browser and mobile testing
5	Final GitHub commits, README, changelog
6	Submission

9. Budget

Item	Cost (ZAR)
Domain (.co.za)	R199/year
Shared hosting	R1,188/year

SSL Certificate	Free
Content / development	R0 (student project)
Total Year 1	R1,387
